

iSheriff Email Security

iSheriff Email Security is a cloud-based anti-spam and email threat protection service. It rids your organization's email of spam, providing a clean email connection and secures against viruses, blended threats, unwanted content and data leakage.

Why do I need Email Security?

If your organization provides employees with email access iSheriff SaaS has a lot to offer you.

Email is the default business communication standard. Yet despite its maturity it is fraught with security weaknesses and plagued with threats such as spam, phishing and malware.

Spam is undoubtedly the biggest negative for email. Spam volume has more than doubled since 2008 and continues to worsen. It has long been the attack vector of choice for hackers and criminals and now spammers have entered the assault on your email via botnets, fake anti-virus programs and blended threats.

Incoming email threats are not the only concern. Your organization may be exposed to intentional and unintentional security risk from within. Most organizations place a special significance on their commercially sensitive and private data which is susceptible to leakage via email. As email is widely considered to be electronic letterhead, the conduct of your employees when using email reflects directly on your business. You need to be certain that email use is safe, secure, productive and appropriate.

Key Features

iSheriff Email Security enables comprehensive security yet is simple and easy to use. Our services target a range of email threats and security concerns:

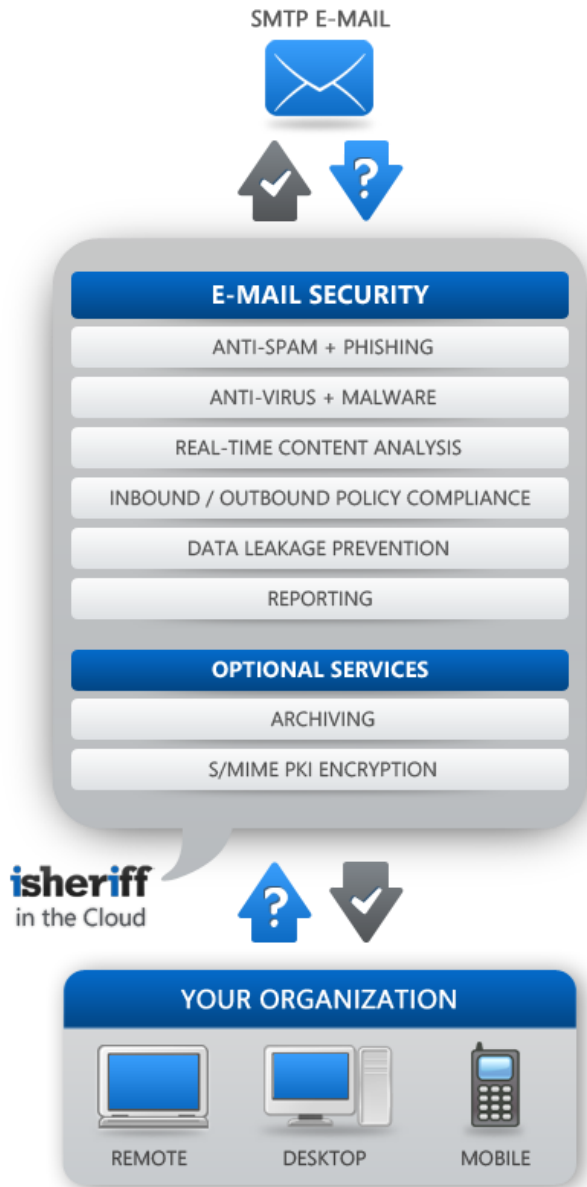

- **Spam & Phishing** – utilizing a layered approach, the service employs the latest range of anti-spam technologies including IP reputation and real-time content analysis to detect and block spam before your email gateway even receives it.
- **Anti-Virus & Blended Threats** – detects and blocks virus attachments and malware, including malicious URL links, ensuring that your organization is protected against the full range of threats which can infect your network via email.
- **Inbound & Outbound Policy Compliance** – manage email content including text and file attachments. Block profanity, oversize messages and easily apply any compliance policies you require with the benefit of dynamic content analysis and message classification.
- **Data Leakage Prevention** – secure the wealth of intellectual property and sensitive data that traverses your organization via email. With iSheriff, you can define sensitive file types or keywords and control the distribution of this material outside of your organization.
- **Security & Compliance Reporting** – access useful and easy to understand reports on spam, threats and your overall email usage. Graphical summaries are provided as well as in-depth reports to help you investigate specific events or user activity. You can run reports by address, file type, and threat category across a wide range of time periods. iSheriff reports allow you to measure the real benefits of Email Security and demonstrate the return on your dollar.
- **Directory Synchronization** – iSheriff provides automated user account directory synchronization to streamline administration and save you time and effort. iSheriff supports all common directory formats including Active Directory and LDAP.

The Many Advantages of iSheriff SaaS

iSheriff SaaS provides your organization with a secure and protected email connection that yields considerable advantages over traditional in-house security solutions:

- **Instant Deployment** – connect to the service and you're immediately up and running.
- **No Upfront Expenditure** – no need to purchase capital and no obsolete hardware.
- **Fixed Costs to Suit any Budget** – iSheriff security service subscriptions start from just USD \$0.09 cents per user a day.
- **Enterprise-Class Security** – you gain the benefit of top email and Web security infrastructure thanks to economies of scale.
- **The Experts Work for You** – your email traffic is managed 24/7 by Internet security experts and modelled against other networks to detect traffic anomalies.
- **Save Bandwidth and Resources** – iSheriff virtually eliminates spam and associated costs*
- **Strength in Numbers** – you gain the shared benefits of being part of a larger security community.
- **Zero Administration** - No tedious upgrades, no maintenance requirements; you always have the latest and best protection.
